Sales and Profit Performance Analysis

Central Business Question:

Which products and regions are driving sales and profit?

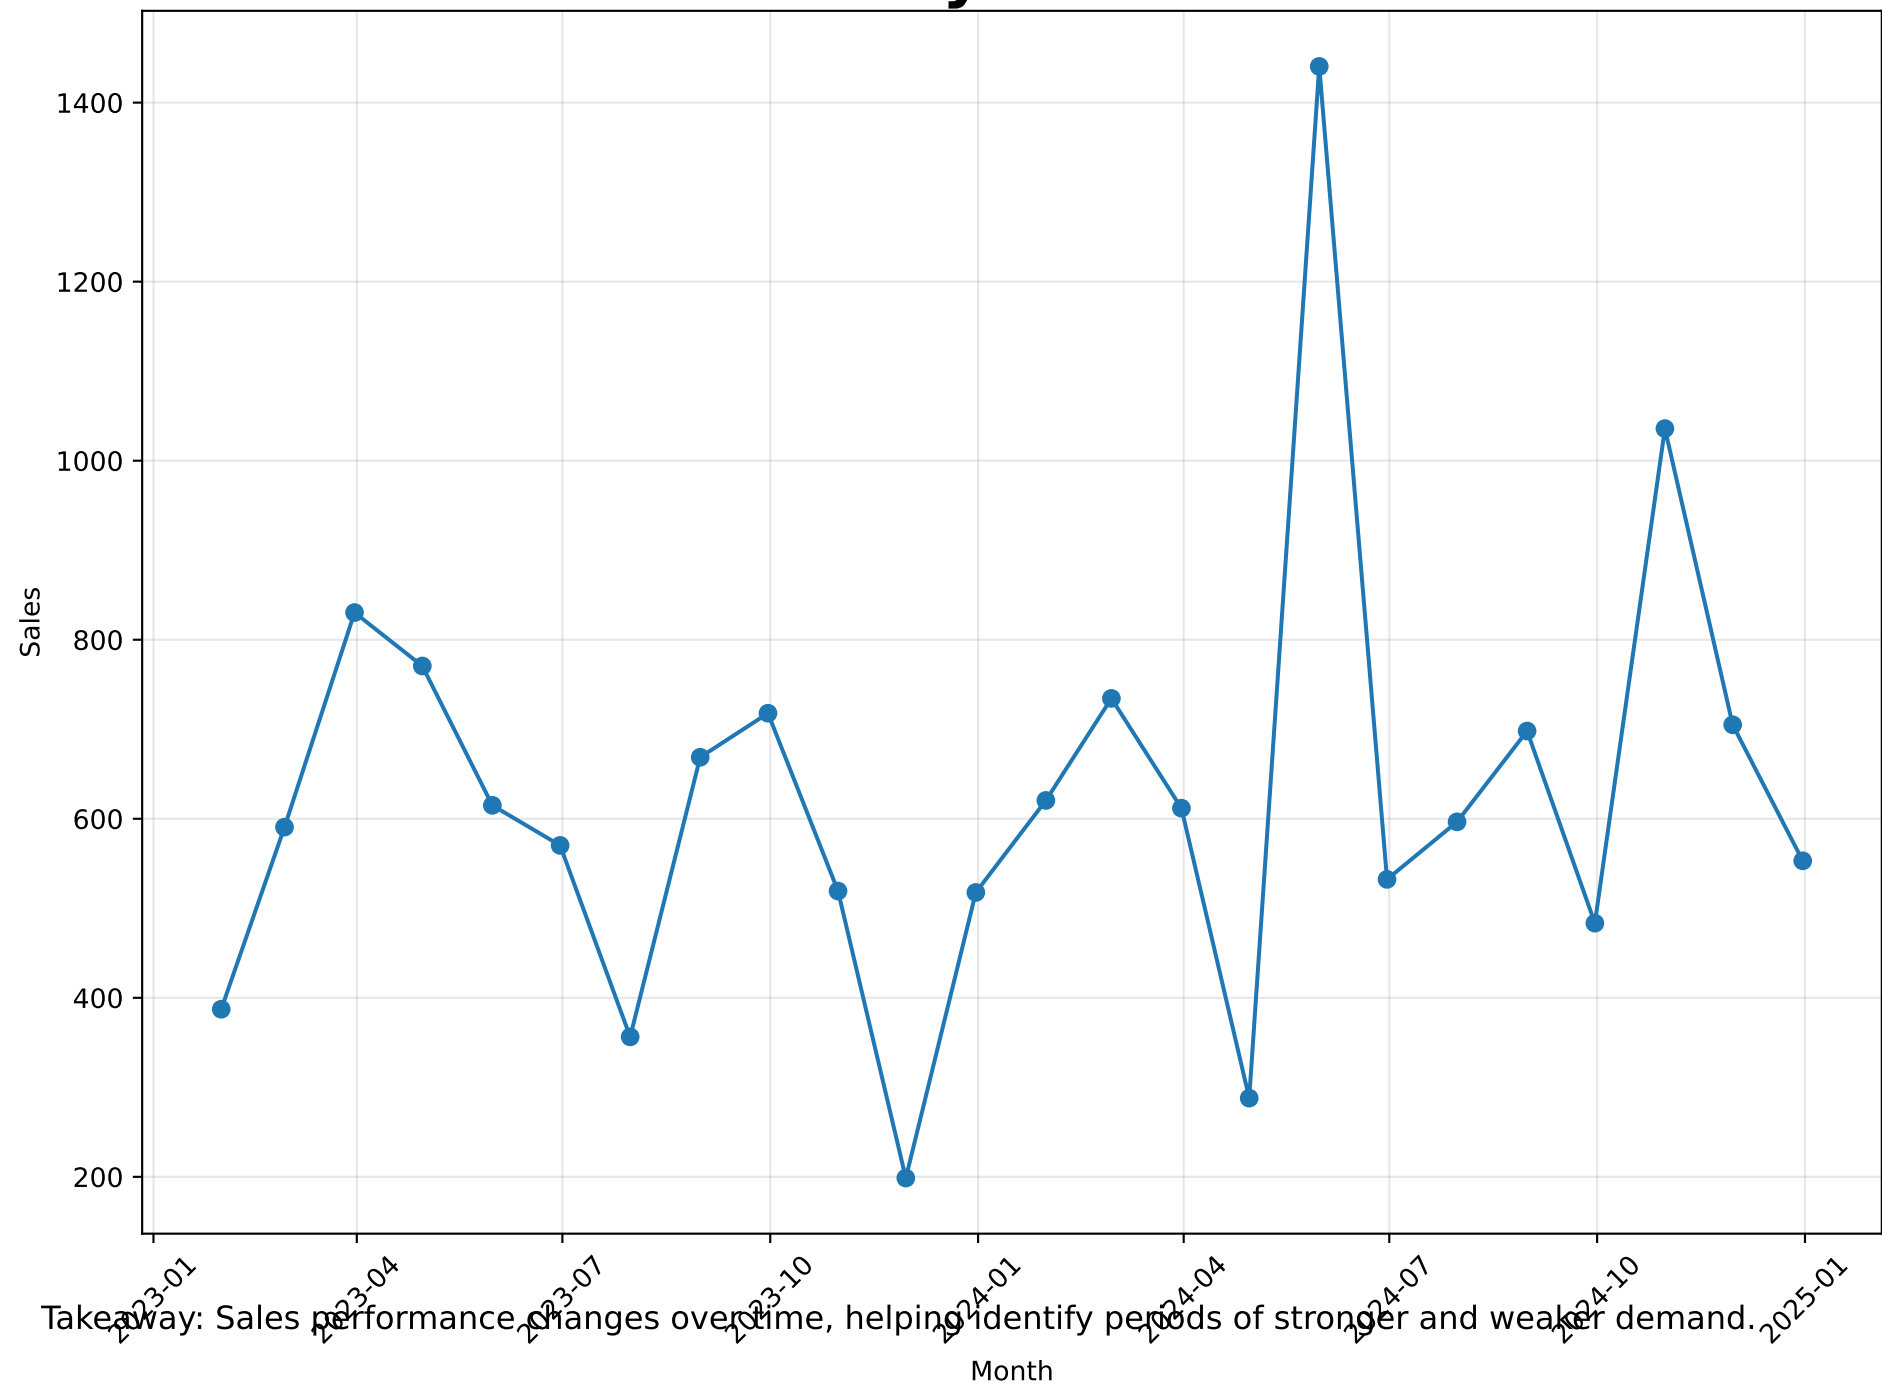

1. Overall Business Performance

TOTAL SALES	TOTAL PROFIT	TOTAL QUANTITY	TOTAL ORDERS
15,041.82	1,701.53	1,097	200

Takeaway:

Overall performance provides a baseline for analysing sales and profitability across different business areas.

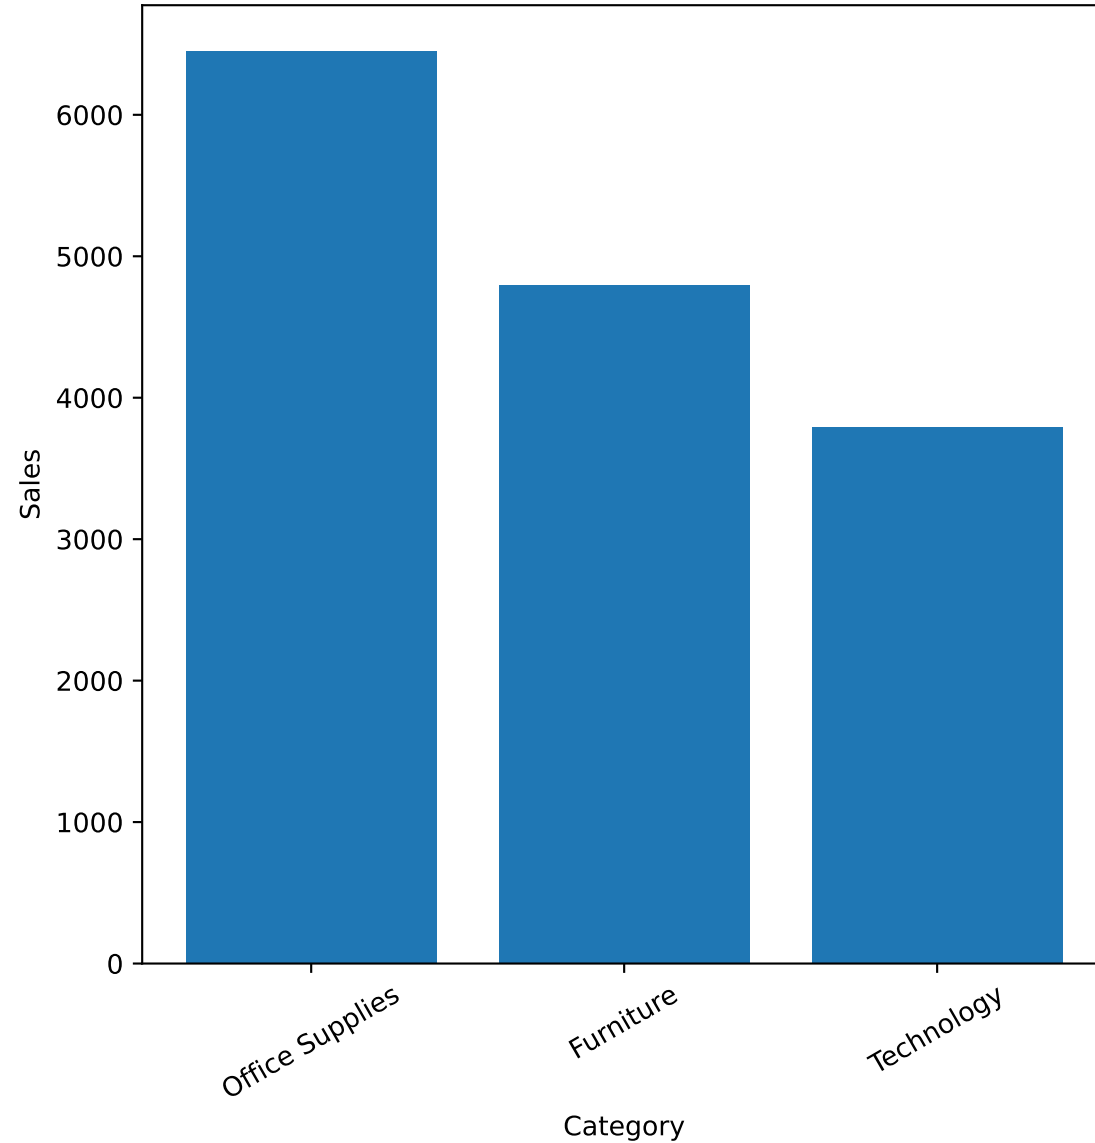

2. Monthly Sales Trend

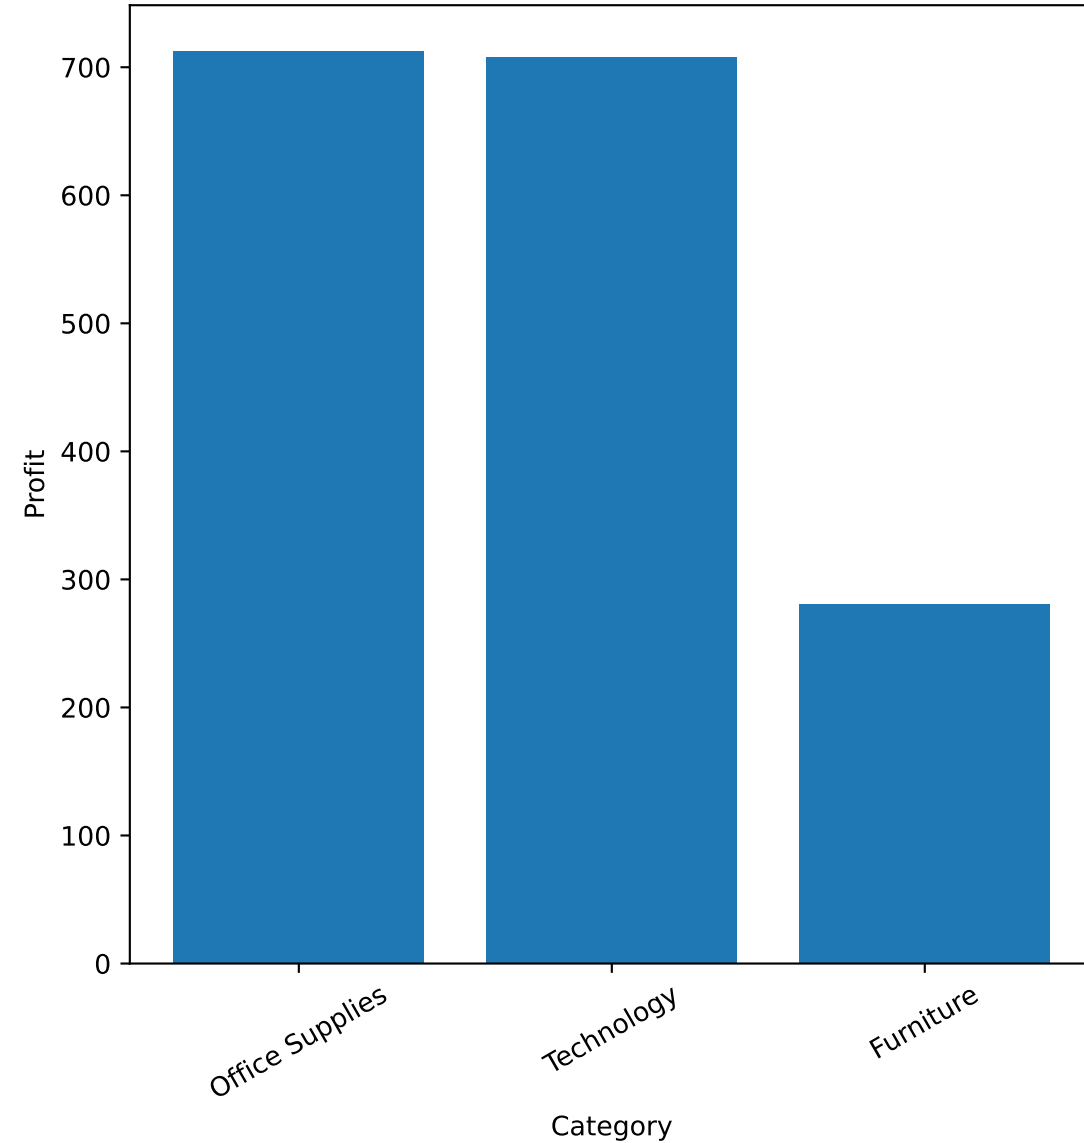

Takeaway: Sales performance changes over time, helping identify periods of stronger and weaker demand.

3. Category Performance

Sales by Category

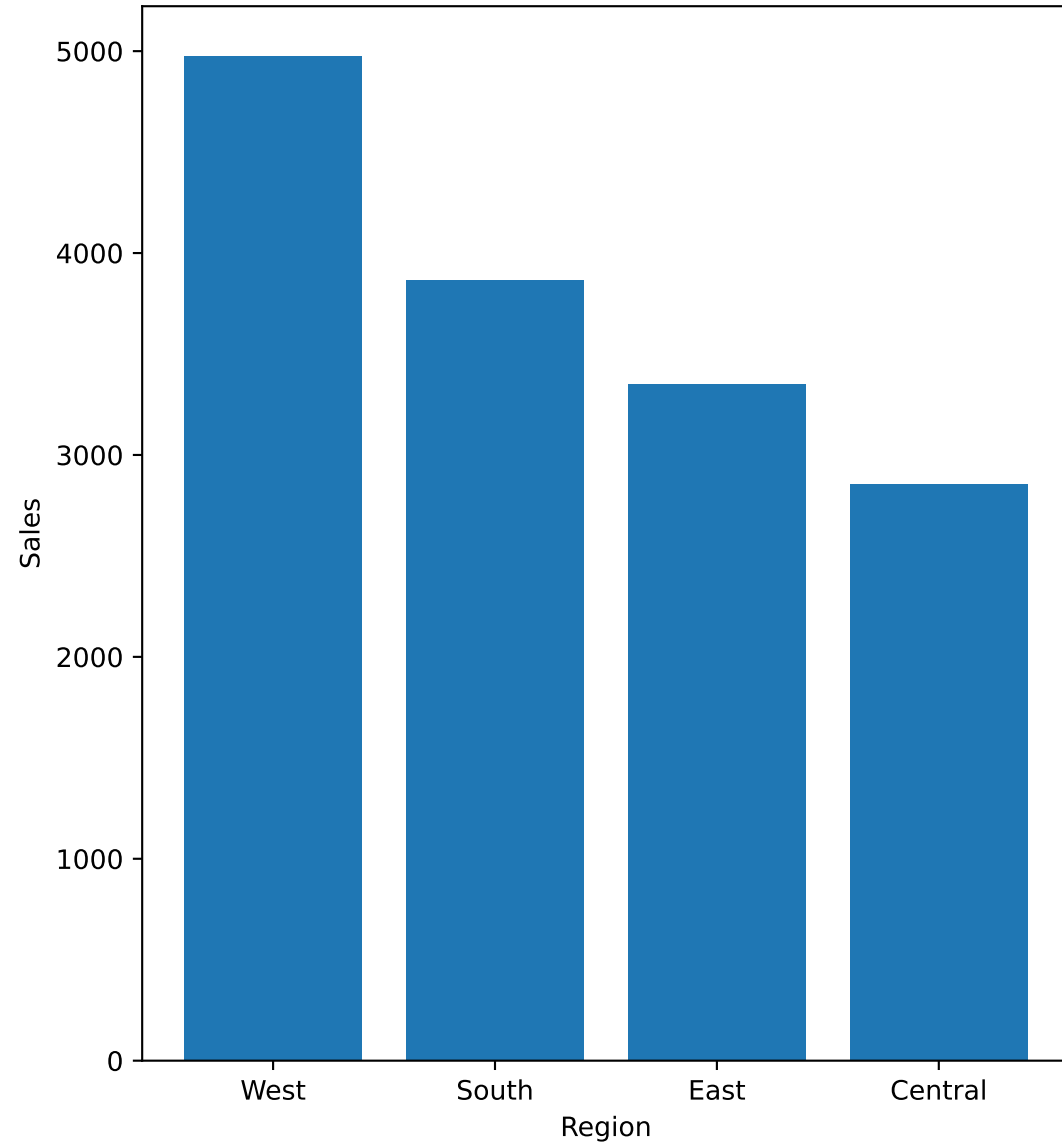

Profit by Category

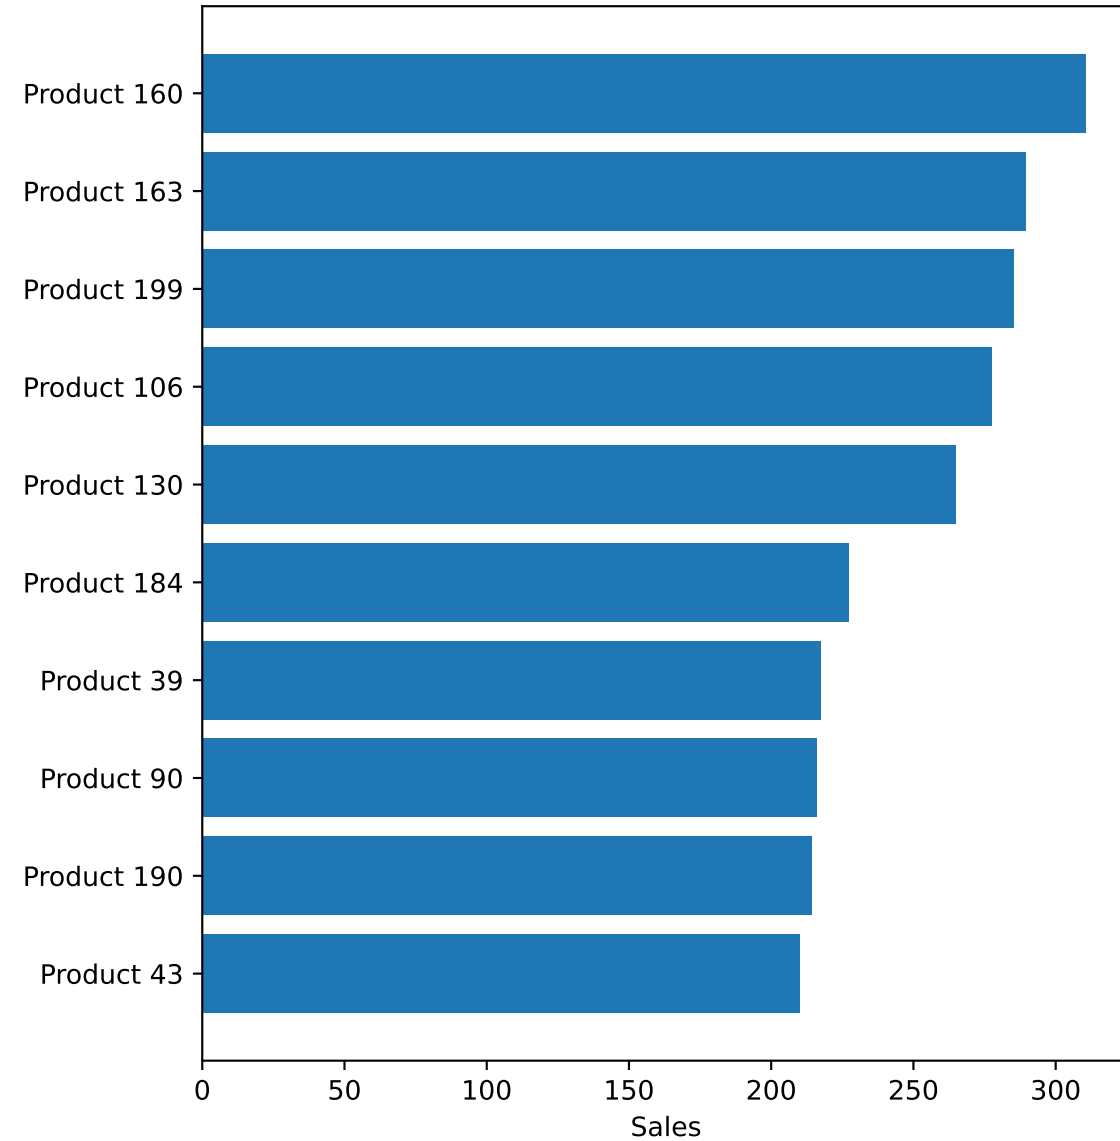

Takeaway: Category-level comparison shows which product groups contribute most to revenue and profitability.

4. Regional and Product Performance

Sales by Region

Top 10 Products by Sales

Takeaway: Regional and product-level analysis highlights the areas and products contributing strongly to sales.

5. Key Insights and Recommendations

KEY INSIGHTS

1. Sales Trend

Sales performance changes across different periods, showing variations in customer demand.

2. Category Performance

Office Supplies is the strongest category based on total profit.

3. Regional Performance

South is the strongest region based on total profit.

4. Product Performance

Product 160 is the highest-selling product in the dataset.

Final Story: Overall performance → Sales trend → Category → Region → Products → Business actions

RECOMMENDATIONS

- Focus on high-performing products and categories.
- Improve the profitability of weaker categories.
- Study successful regions and apply their strategies elsewhere.
- Monitor monthly sales trends for better business planning.
